CONTROLLED BURNING CAPABILITY STATEMENT

CONTROLLED BURNS ON COUNTRY

ABOUT US

Woongal Environmental Services is a **Supply Nation registered** Indigenous business delivering environmental monitoring and management services through partnerships with Traditional Owners On Country.

Controlled burning is one of the ways we work with clients to protect biodiversity, meet regulatory obligations, and incorporate cultural knowledge into land management.

Our **Indigenous ranger team** blends traditional practices with environmental science to deliver safe, compliant, and effective fire management.

WOONGAL
ENVIRONMENTAL SERVICES

OUR EXPERTISE

Woongal has delivered controlled burns across a range of environments, including mining lease rehabilitation areas, and offset management areas.

Our fire management expertise includes:

Planning and execution of controlled burns

Pre- and post-burn environmental monitoring

CASE SNAPSHOT

Project: Rehabilitation Site – Central Queensland

Objective: Reduce fuel loads to meet environmental compliance requirements.

Approach:

- Conducted a pre-burn site inspection to assess vegetation and safety conditions.
- Prepared firebreaks and briefed all crew on safety and compliance procedures.
- Executed a controlled ignition over a two-day period under approved weather and permit conditions.

Result:

- Fuel loads reduced to meet compliance targets.
- Site conditions improved, supporting native vegetation regeneration.
- Burn completed on schedule with zero safety incidents and full compliance with permit conditions.

OUR APPROACH

At Woongal, controlled burns are planned and delivered with a strong focus on safety, compliance, and environmental outcomes. Each burn is tailored to the site's specific conditions and regulatory requirements. Our team follows a proven process that keeps operations on schedule while meeting environmental objectives.

1. Site Readiness – Confirm permits, compliance requirements, and seasonal conditions

2. Stakeholder Engagement – Align objectives and timing with land managers and regulators.

3. Safety Preparation – Check PPE, brief the crew, and review contingency plans.

4. Burn Execution – Carry out the burn in approved conditions using experienced crews.

5. Post-Burn Monitoring – Assess the site, record results, and prepare reports for stakeholders.
